

RECENTLY DISCOVERED ERRATUM

Proceedings of the 4th International Symposium on Sturgeon *Journal of Applied Ichthyology* (Volume 18, 2002)

Darrel E. Snyder (e-mail: darrel.snyder@colostate.edu); 14 December 2015
Larval Fish Laboratory, Colorado State University, Fort Collins, Colorado, 80521-1474, USA

In Figure 2 of Snyder (2002. Pallid and Shovelnose sturgeon larvae—morphological description and identification. *Journal of Applied Ichthyology* 18:240-265), the drawings of recently hatched Pallid and Shovelnose sturgeon were mistakenly transposed when the figure was divided and continued on the next page. The larva illustrated above the legend on page 253 is of the Shovelnose Sturgeon (not Pallid Sturgeon as indicated in the legend) and was the lower of the two three-view drawings in the original figure; correspondingly, the larva illustrated, and continuing Figure 2, on page 254 is of the Pallid Sturgeon and was the upper of the two drawings in the original figure. I apologize for having overlooked the error when I reviewed the pre-publication proof and for not catching and reporting the error sooner.

Also, the article is based in part on additional data referenced and archived in LarvalBase (www.larvalbase.org/Snyder2002/). Although the home webpage for LarvalBase remains, online access to images and data in LarvalBase has not been available in recent years. However, that additional data is included in a full agency report version of the article which can be downloaded as a PDF document from the Colorado State University Larval Fish Laboratory website (<http://warnercnr.colostate.edu/docs/fwcb/lfl/PDF/LFL-106-Snyder-1999-Report.pdf>).
